

PRELIMINARY AMENDMENT
U.S. Appln. No. 10/077,925

primary display is one of said selected broadcast program and a graphic display containing information about said selected broadcast program,

wherein a secondary display containing additional information relating to said selected broadcast program is located underneath said primary display,

wherein, in response to a user input from a user, said controller automatically exposes said secondary display on said screen by removing said primary display at least partially off of said secondary display so that said additional information can be viewed by said user, and

wherein said selected broadcast program is selected by said user.

86. The apparatus as claimed in claim 85, wherein said primary display is said selected broadcast program.

a2
87. The apparatus as claimed in claim 85, wherein said primary display is said graphic display.

88. The apparatus as claimed in claim 87, wherein said graphic display comprises schedule information relating to scheduled broadcasts of a plurality of broadcast programs, and wherein said selected broadcast program is one of said plurality of broadcast programs.

89. The apparatus as claimed in claim 88, wherein said user can input at least one selection input to select said schedule information relating to said selected broadcast program, and

PRELIMINARY AMENDMENT
U.S. Appln. No. 10/077,925

wherein, after selecting said schedule information relating to said selected broadcast program, said user can input said user input to instruct said controller to display said secondary display.

90. The apparatus as claimed in claim 85, wherein said controller exposes said secondary display by sliding said primary display off of said secondary display.

91. The apparatus as claimed in claim 90, wherein, in response to and after said user input is input, said controller automatically and completely exposes said secondary display.

92. The apparatus as claimed in claim 90, wherein said primary display is at least partially slid off of said screen.

93. The apparatus as claimed in claim 85, wherein said controller exposes said secondary display by rolling said primary display off of said secondary display.

94. The apparatus as claimed in claim 93, wherein, in response to and after said user input is input, said controller automatically and completely exposes said secondary display.

95. The apparatus as claimed in claim 85, wherein said controller exposes said secondary display by disintegrating said primary display off of said secondary display.

PRELIMINARY AMENDMENT
U.S. Appln. No. 10/077,925

96. The apparatus as claimed in claim 95, wherein, in response to and after said user input is input, said controller automatically and completely exposes said secondary display.

97. The apparatus as claimed in claim 85, wherein said user input is generated when said user presses a certain button on a control device.

98. The apparatus as claimed in claim 33, wherein said primary display is a broadcast program.

99. The apparatus as claimed in claim 35, wherein said additional information contained in said window relates to said broadcast program.

100. The apparatus as claimed in claim 37, wherein said computer-generated graphic display contains information relating to a broadcast program, and
wherein said additional information contained in said window relates to said broadcast program.

101. The method as claimed in claim 75, wherein said primary display is a broadcast program.

102. The method as claimed in claim 77, wherein said additional information contained in said window relates to said broadcast program.

PRELIMINARY AMENDMENT
U.S. Appln. No. 10/077,925

a2 103. The method as claimed in claim 79, wherein said computer-generated graphic display contains information relating to a broadcast program, and wherein said additional information contained in said window relates to said broadcast program.
